

Oncology Professional Care 2024 FIRE RISK ASSESSMENT

Event: Oncology Professional Care 2024	Venue: ExCeL London, Halls N14 – N16	Event Director: Laura Shapiro
Date RA Undertaken: 27 March 2024	RA undertaken by: Beth Cummins	Key Distribution: <ul style="list-style-type: none">• CloserStill Media• Official Contractors• Stand Contractors• Exhibitors <p>This risk assessment & updates are public documents and should be made available to anyone with reasonable cause to request it. It will also be distributed to all official or other retained contractors, venues & other key staff, and suppliers.</p>
Organiser: CloserStill Media Ltd	Dates: Build: 20 th May 2024 - 06:00hrs to 20:00hrs Open: 21 st May 2024 - 09:00hrs to 17:30hrs 22 nd May 2024 - 09:00hrs to 16:30hrs Breakdown: 22 nd May 2024 - 17:00hrs to 22:00hrs	

EVENT DESCRIPTION

- **Oncology Professional Care 2024** is trade exhibition, attracting exhibitors and visitors from Oncology sectors in the UK and overseas.
- Proof of trade is required for registration and entry.
- Attendance over the 2 open days is traditionally 1,200 visitors, plus 300+ of exhibitor personnel, which is well within the safe floor limit of the venues.
- The build profile is normal, with approximately 10 stands designated as 'Space Only' and 80 as 'Shell Scheme'. Double-deck or 'complex' stands are permitted only where pre-agreed and subject to inspections by a competent structural engineer at the design and build stages.
- The event has a safe history regarding Health and Safety (H&S) and has not needed to report a RIDDOR incident in the tenure of the current team and contractors.
- For general hazards, please see separate Risk Assessment. For the avoidance of doubt, any remedial work conducted during the open days of the event (outside published open hours), will be categorised as taking place during the Construction Phase of the event.
- Children under the age of 18 are not permitted into the halls during build and breakdown.
- The venue has a comprehensive detection and alarm system, which is detailed in the venue risk assessment. The venue is responsible for placing fire extinguishers around the show and supplying a layout plan to the Organisers, which will be available for the duration of the tenancy.
- Emergency procedures are distributed to all exhibitors and contractors pre-show, and copies are also available onsite in the Organiser's office.
- All onsite CSM staff will also receive a copy of the emergency procedures pre-show and briefed on what to do in the event of threat and/or evacuation.
- All exhibitors are required to complete a Fire Risk assessment covering activities / onsite demonstrations which could lead to a fire on their stand. All approved activities will be subject to daily checks onsite by the health & safety floor manager.

Oncology Professional Care 2024 FIRE RISK ASSESSMENT

FIRE RISK ASSESSMENT

This Fire Risk Assessment is designed to stand alongside the event’s Risk Assessment and Construction Phase Assessment plan.

This Fire Risk Assessment covers the build-up, open period, and breakdown for **Oncology Professional Care 2024**. It also covers early and late access (should it be required), and post show hospitality.

The Exhibitor Manual contains exhibitor responsibilities for the event relating to Health & Safety and Risk Assessments. All exhibitors are required to confirm that they have undertaken a Risk Assessment for the event, and to submit it to the Organiser should any potential hazards arise that are associated with their presence at the event. All Space Only exhibitors are also required to submit Stand Plans and supporting documents (including a detailed Risk Assessment covering both build-up and breakdown) via their Stand Contractors for approval, prior to arriving onsite.

The Official Suppliers to the show are also required to submit a Risk Assessment for their areas of responsibility. CloserStill Media (CSM) staff will arrange for a Floor Manager (FM) to be onsite to support the safe delivery of the event.

CSM will arrange for a Floor Manager (FM) to be onsite to support the safe delivery of the event.

CALCULATION OF RISK

Probability (P)	Severity (S)	Calculations of Risk (P x S)	Action Level
5: Certain	5: Death	1 - 5	Low (L): Acceptable Risk, but monitor regularly
4: Likely	4: Life Changing Injury	6 – 11	Medium (M): Acceptable Risk, but monitor frequently
3: Possible	3: RIDDOR / Major Injury	12 – 18	High (H): Implement immediate changes / further controls
2: Unlikely	2: Non-RIDDOR / Significant injury	19 – 25	UNACCEPTABLE (U): Cease action immediately
1: Rare	1: Minor injury		

IMPORTANT NOTE

This Fire Risk Assessment is to be treated as a live working document. CSM reserves the right to alter, update, or amend the details contained herein in response to any new information or procedures that arise.

HAZARDS IDENTIFIED

ARSON	3
CATERING FACILITIES.....	3
Use of COMPRESSED GASES	4
DUST from wood saws or construction work.....	4
FUEL in Vehicles.....	5

HOT WORKS (inc. welding and naked flames)	6
Use of defective MACHINERY / POWER TOOLS	6
Combustible STAND MATERIALS.....	7
Build-up of WASTE	8

Probability (P)	Severity (S)	Calculation of Risk (R): P X S	
5: Certain	5: Death	1 - 5	LOW (L): Acceptable Risk, but monitor regularly
4: Likely	4: Life Changing Injury	6 – 11	MEDIUM (M): Acceptable Risk, but monitor frequently
3: Possible	3: RIDDOR / Major Injury	12 – 18	HIGH (H): Implement immediate changes / further controls
2: Unlikely	2: Non-RIDDOR / Significant injury	19 – 25	UNACCEPTABLE (U): Cease action immediately
1: Rare	1: Minor injury
